Subject: Same Leaves

The Daily Byte

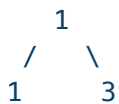

Good morning,

Need help with yesterday's problem? Start getting solutions.

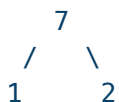

Today's Byte

Given two binary trees, return whether or not both trees have the same leaf sequence. Two trees have the same leaf sequence if both trees' leaves read the same from left to right.

Ex: Given the following trees...

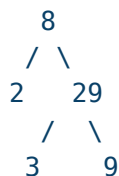

and

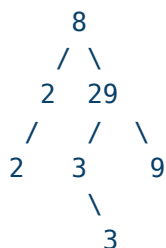

return false as both the trees' leaves don't read the same from left to right (i.e. [1, 3] and [1, 2]).

Ex: Given the following trees...

and

return true as both the trees' leaves read the same from left to right (i.e. [2, 3, 9] and [2, 3, 9]).

Thanks,
The Daily Byte
