Subject: Gather N-ary Tree Levels

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

Given an n-ary tree, return its level order traversal.

Note: an n-ary tree is a tree in which each node has no more than N children.

Ex: Give the following n-ary tree...

```

      8
     / | \
    2  3 29
return [[8], [2, 3, 29]]

```

Ex: Given the following n-ary tree...

```

      2
     / | \
    1  6  9
     / | \
    8  2  2

```

```
    / | \  
19 12 90  
return [[2], [1, 6, 9], [8, 2, 2], [19, 12, 90]]
```

Thanks,
The Daily Byte
