Subject: Gather Columns

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

Given a binary tree, return its column order traversal from top to bottom and left to right. Note: if two nodes are in the same row and column, order them from left to right.

Ex: Given the following tree...

```
      8
     / \
    2   29
     / \
    3   9
return [[2], [8, 3], [29], [9]]
```

Ex: Given the following tree...

```
    100
   /  \
  53   78
```

```
 / \  / \  
32 3 9  20  
return [[32], [53], [100, 3, 9], [78], [20]]
```

Thanks,
The Daily Byte
