Subject: Compare Keystrokes

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

This question is asked by Amazon. Given two strings s and t , which represents a sequence of keystrokes, where $\#$ denotes a backspace, return whether or not the sequences produce the same result.

Ex: Given the following strings...

```
s = "ABC#", t = "CD##AB", return true  
s = "como#pur#ter", t = "computer", return true  
s = "cof#dim#ng", t = "code", return false
```

Thanks,
The Daily Byte
