Subject: Create Trie

The Daily Byte

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

Today's Byte

This question is asked by Microsoft. Implement a trie class that supports insertion and search functionalities.

Note: You may assume only lowercase alphabetical characters will be added to your trie.

Ex: Given the following operations on your trie...

```
Trie trie = new Trie()
trie.insert("programming");
trie.search("computer") // returns false.
trie.search("programming") // returns true.
```

Thanks,
The Daily Byte
