## The Daily Byte

---

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

### Today's Byte

Given a string  
`s`, return the length of the longest substring containing at most two  
distinct characters.

Note: You may assume that  
`s` only contains lowercase alphabetical characters.

Ex: Given the following value of  
`s` ...

`s = "aba"`, return 3.

Ex: Given the following value of  
`s` ...

`s = "abca"`, return 2.

Thanks,  
The Daily Byte
