Subject: String Permutations

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

This question is asked by Amazon. Given a string `s` consisting of only letters and digits, where we are allowed to transform any letter to uppercase or lowercase, return a list containing all possible permutations of the string.

Ex: Given the following string...

`S = "c7w2", return ["c7w2", "c7W2", "C7w2", "C7W2"]`

Thanks,
The Daily Byte
