**Subject:** Keyboard Row

### The Daily Byte

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

#### Today's Byte

Given a list of words, return all the words that require only a single row of a keyboard to type.

Note: You may assume that all words only contain lowercase alphabetical characters.

Ex: Given the following list of  
words ...

```
words = ["two", "dad", "cat"], return ["two", "dad"].
```

Ex: Given the following list of  
words ...

```
words = ["ufo", "xzy", "byte"], return [].
```

Thanks,  
The Daily Byte
