Subject: Remove Nth to Last Node

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

This question is asked by Facebook. Given a linked list and a value n , remove the n th to last node and return the resulting list.

Ex: Given the following linked lists...

```
1->2->3->null, n = 1, return 1->2->null  
1->2->3->null, n = 2, return 1->3->null  
1->2->3->null, n = 3, return 2->3->null
```

Thanks,
The Daily Byte
