Subject: Reverse Number

The Daily Byte

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

Today's Byte

This question is asked by Apple. Given a 32 bit signed integer, reverse it and return the result.

Note: You may assume that the reversed integer will always fit within the bounds of the integer data type.

Ex: Given the following integer

num ...

```
num = 550, return 55
```

Ex: Given the following integer

num ...

```
num = -37, return -73
```

Thanks,
The Daily Byte
