## The Daily Byte

---

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

---

### Today's Byte

Given a string,  
`s`, return the length of the last word.

Note: You may not use any sort of  
`split()` method.

Ex: Given the following string...

```
s = "The Daily Byte", return 4 (because "Byte" is four  
characters long).
```

Thanks,  
The Daily Byte
