The Daily Byte

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

Today's Byte

This question is asked by Facebook. Given the root of a binary tree and two values

low and

high return the sum of all values in the tree that are within

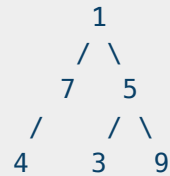

low and

high .

Ex: Given the following tree where

low = 3 and

high = 5 ...

return 12 (3, 4, and 5 are the only values within low and high and they sum to 12)

Thanks,
The Daily Byte
