The Daily Byte

Good morning,

Need help with yesterday's problem? [Start getting solutions.](#)

Today's Byte

Given a binary tree, return a list containing its inorder traversal without using recursion.

Ex: Given the following tree...

```
    2
   / \
  1   3
return [1, 2, 3]
```

Ex: Given the following tree...

```
    2
   / \
  1   7
 / \
4   8
return [4, 1, 8, 2, 7]
```

Thanks,
The Daily Byte
