Subject: Add Binary

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

Today's Byte

This question is asked by Apple. Given two binary strings (strings containing only 1s and 0s) return their sum (also as a binary string).
Note: neither binary string will contain leading 0s unless the string itself is 0

Ex: Given the following binary strings...

```
"100" + "1", return "101"  
"11" + "1", return "100"  
"1" + "0", return "1"
```

Thanks,
The Daily Byte
