Subject: Rearrange Elements

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

| Today's Byte |

This question is asked by Apple. Given an array of numbers, move all zeroes in the array to the end while maintaining the relative order of the other numbers.
Note: You must modify the array you're given (i.e. you cannot create a new array).

Ex: Given the following array `nums` ...

```
nums = [3, 7, 0, 5, 0, 2], rearrange nums to look like the
following [3,7,5,2,0,0]
```

Thanks,
The Daily Byte
