Subject: Dictionary Words

The Daily Byte

Good morning,

Need help with yesterday's problem? Start getting solutions.

> Today's Byte

This question is asked by Amazon. Given a string
s and a list of words representing a dictionary, return whether or not
the entirety of
s can be segmented into dictionary words.
Note: You may assume all characters in
s and the dictionary are lowercase.

Ex: Given the following string
s and
`dictionary` ...

```
s = "thedailybyte", dictionary = ["the", "daily", "byte"],
return true.
```

Ex: Given the following string

s and

dictionary ...

```
s = "pizzaplanet", dictionary = ["plane", "pizza"], return
false.
```

Thanks,
The Daily Byte
